

GENIE Z60/ LONG REACH

The Genie Z60 Access Railer is designed for structural inspections including **access and repair of elevated structures, above or close to the railway.**

Designed for working on **OHL equipment and high-level vegetation control**, the Genie Z60 makes it possible to reach almost all areas from one line at a **working height of 11.22m and an outreach of 11m at full height.** The machine can also **tow up to 1T** making it completely self-reliant for carrying tools and equipment.
