

COVID-19 Update – 06.01.2021

Firstly, I hope you all had a safe festive period, and welcome back into 2021.

There have been a number of changes recently with COVID-19 restrictions, some coming into effect before Christmas, but more recently, the Prime Ministers announcement of a further national lockdown. While this news can cause concern, we have successfully worked through such restrictions and we are very well prepared for this.

For TXM Plant, we will continue to operate a business as usual approach and remain fully operational. We have been here before and TXM, and the Industry, are now far better prepared, having developed methods and practices through the last 9-months.

The Railway Network plays an essential part in **keeping Britain connected**. Throughout COVID-19 the Government has looked to the Construction and Infrastructure sector to keep the country moving and will encourage continued working throughout this period too. As previously, a number of procedures are in place including:

- We have ensured a **safe working environment** for our people, our customers and the wider supply chain
- Everyone must continue to follow all safety measures in place including social distancing and regular hand washing
- Face coverings shall be used by all staff, contractors and visitors when visiting TXM Plant offices to wear in office corridors and canteens

Please keep yourself and your families safe, whether in work or out and thank you all once again for your support through these challenging times.

Thank you all for your support,

Brian Reynolds, Chief Executive Officer
