

Driving Policy Statement

As TXM Plant Limited's Chief Executive Officer, TXM Plant takes the safety of its employees and the public very seriously. We are recognised through valuing our people, our commitment to each other and our determination to ensure no injuries or fatalities arise as a consequence of our work or services we provide.

TXM Plant recognise that driving for work is one of the most dangerous activities our people undertake. In the UK over 327 billion road miles are driven every year, with 468 casualties and 5 fatalities occurring every day - so getting the basics right is crucial, to not only keep our people safe but for the safety of other road users as well.

Driver risk management plays an essential part, and as such, the TXM Fleet Department and SHEQ team have worked together in producing and developing 'TXM Driver Policy' which has been endorsed by the Board of Directors.

Safe driving practice is mandated both by law and Company policy. You also have a personal responsibility to drive safely, ensure your vehicle is roadworthy and to comply with TXM Plant policies, the Highway Code and any other legislation/regulations that are pertinent to the use of the vehicle.

It is essential that you make yourself fully conversant with the contents of the TXM Plant Driver Policy. There are legal and financial penalties to both you as an individual and potentially TXM Plant for non-compliance or inappropriate behaviour.

The TXM Plant Driver Policy is designed to keep you safe, TXM Plant compliant and to maintain our image and reputation.

Brian Reynolds
Chief Executive Officer
