

Environmental Policy Statement

As one of the UK's leading suppliers of On Track Plant (OTP) and Plant Operation Scheme (POS) TXM Plant shall continually strive to ensure that our activities do not adversely impact on the environment by working with our clients and customers in open and mutual collaboration.

We are committed to:

- Preventing pollution and contamination, minimising emissions and reducing waste, and not adversely affecting our environment or local community.
- Efficiently managing our use of energy, water and materials by minimising waste through re-using and recycling.
- Monitoring and conforming to relevant environmental legislation affecting our business, and ensuring our staff and contractors implement this environmental policy.
- Training our employees to enhance their environmental awareness and ensuring effective management of our environmental impacts.
- Collaboration with others such as suppliers, customers, and authorities to identify environmental issues and to seek solutions.
- Ensuring our activities are managed professionally, assessing our environmental aspects and impacts, and taking action to minimise any risks.
- Investigating all environmental incidents to ensure the root causes are identified and corrective and preventive action is taken.
- Engaging with customers and professionals, and institutional organisation's to help us to continually improve and raise our environmental standards.
- We will also set environmental objectives which will be monitored and establish new objectives wherever our system may benefit from doing so

We shall ensure that adequate resources are made available for the success and implementation of our Environmental Policy.

Brian Reynolds
Chief Executive Officer
